

CROP VEATHER

Kansas Department of Agriculture U.S. Department of Agriculture PO Box 3534 Topeka, Kansas 66601-3534

Phone: 785-233-2230

Released: November 20, 2006 Volume 06, No. 47

Agricultural Summary: The State received very little rain over the week with areas receiving precipitation concentrated in the southeast. Producers averaged 6.4 days suitable for fieldwork last week. Row crop harvesting is wrapping up or complete in most areas. Topsoil moisture was rated 12 percent very short, 42 percent short, and 46 percent adequate. Subsoil moisture was rated 27 percent very short, 44 percent short, and 29 percent adequate.

Field Crop Report: Ninety-eight percent of the wheat has emerged, the same as last year but three points ahead of the 5-year average. Eight percent has been pastured. Wheat condition was rated 2 percent very poor, 5 percent poor, 38 percent fair, 46 percent good, and 9 percent excellent. Ninety-eight percent of the corn has been harvested, one point behind both last year and the 5-year average. Ninety-two percent of the sorghum has been harvested, compared to 96 percent last year and 90 percent for the 5-year average. Ninety-eight percent of the soybeans have been harvested, compared to 99 percent last year and 95 percent for the 5-year average. Ninety-two percent of the sunflowers have been harvested, four points behind last year but the same as the 5-year average. Fifty percent of the cotton has been harvested, compared to 65 percent last year and 43 percent for the 5-year average. Cotton condition was rated 5 percent very poor, 10 percent poor, 30 percent fair, 45 percent good, and 10 percent excellent.

Pasture and Range Report: Range and pasture conditions were rated 18 percent very poor, 32 percent poor, 36 percent fair, 12 percent good, and 2 percent excellent. Feed grain supplies were rated 2 percent very short, 13 percent short, 81 percent adequate, and 4 percent surplus. Hay and forage supplies were rated 14 percent very short, 34 percent short, 49 percent adequate, and 3 percent surplus. Stock water supplies were rated 21 percent very short, 30 percent short, and 49 percent adequate.

This is a cooperative effort with Kansas State Research & Extension Service, the KSU Weather Data Library, and Kansas Agricultural Statistics Service
